

AMENDMENT

Serial Number: 09/775,366

Filing Date: February 1, 2001

Title: ELECTRONIC DEVICE PACKAGE

Page 2

Dkt: 303.706US1

IN THE CLAIMS

1. (Original) An integrated circuit package comprising:
- a substrate;
 - a die; and
 - a material having a Young's modulus of between about .1 megapascals and about 20 megapascals, at a solder reflow temperature, attaching the die to the substrate.
2. (Original) The integrated circuit package of claim 1, wherein the substrate comprises a ceramic.
3. (Original) The integrated circuit package of claim 1, wherein the die comprises one or more memory circuits.
4. (Original) The integrated circuit package of claim 1, wherein the die comprises one or more processor circuits.
5. (Original) The integrated circuit package of claim 1, wherein the die comprises one or more logic circuits.
6. (Original) The integrated circuit package of claim 1 wherein the die comprises one or more application specific integrated circuits.
7. (Original) The integrated circuit package of claim 1, wherein the material comprises a poly epoxide formed from one epoxide.
8. (Original) The integrated circuit package of claim 1, wherein the material comprises a poly epoxide formed from two or more epoxides.

9. (Original) The integrated circuit package of claim 1, wherein the material comprises a polyacrylate.

10. (Original) The integrated circuit package of claim 1, wherein the material comprises a polyolefin.

11. (Original) The integrated circuit package of claim 1, wherein the material comprises a polyimide.

12. (Original) The integrated circuit package of claim 1, wherein the material comprises a mixture of at least two of a poly epoxide, polyacrylate, polyimide, and polyolefin.

13. (Original) The integrated circuit package of claim 1, wherein the material comprises a copolymer of at least two of a poly epoxide, a polyacrylate, polyimide, and polyolefin.

14. (Original) The integrated circuit package of claim 1, wherein the material comprises a mixture of a poly epoxide and a polyimide.

15. (Original) The integrated circuit package of claim 1, wherein the material comprises a copolymer of a poly epoxide and a polyimide.

16. (Original) The integrated circuit package of claim 1, wherein the material has a Shore A hardness of greater than about 70.

17. (Original) The integrated circuit package of claim 1, wherein the material has a Shore D hardness of greater than about 20.

18. (Previously amended) An integrated circuit package comprising:
a substrate;

19. (Original) The integrated circuit package of claim 18, wherein the substrate comprises a single metal layer glass-epoxide.

20. (Original) The integrated circuit package of claim 18, wherein the die comprises one or more processor circuits.

21. (Original) The integrated circuit package of claim 18 wherein the die comprises one or more memory circuits.

22. (Original) The integrated circuit package of claim 18, wherein the die comprises one or more logic circuits.

23. (Original) The integrated circuit package of claim 18, wherein the die comprises one or more application specific integrated circuits.

24. (Original) The integrated circuit package of claim 18, wherein the material comprises a poly epoxide formed from one epoxide.

25. (Original) The integrated circuit package of claim 18, wherein the material comprises a poly epoxide formed from two or more epoxides.

26. (Original) The integrated circuit package of claim 18, wherein the material comprises a polyacrylate.

27. (Original) The integrated circuit package of claim 18, wherein the material comprises a polyolefin.

28. (Original) The integrated circuit package of claim 18, wherein the material comprises a polyimide.

29. (Original) The integrated circuit package of claim 18, wherein the material comprises a mixture of at least two of a poly epoxide, polyacrylate, polyimide, and polyolefin.

30. (Original) The integrated circuit package of claim 18, wherein the material comprises a copolymer of at least two of a poly epoxide, a polyacrylate, polyimide, and polyolefin.

31. (Original) The integrated circuit package of claim 18, wherein the material comprises a mixture of a poly epoxide and a polyimide.

32. (Original) The integrated circuit package of claim 18, wherein the material comprises a copolymer of a poly epoxide and a polyimide.

33. (Original) The integrated circuit package of claim 18, wherein the material has a Shore A hardness of greater than about 70.

34. (Original) The integrated circuit package of claim 18, wherein the material has a Shore D hardness of greater than about 20.

35. (Original) An integrated circuit package comprising:

a substrate;

a die; and

a rigid die attach material attaching the die to the substrate.
